uses programmer-defined types

Correct!

aliasing

term for a parameter representi

Correct!

copy.copy

method used to make a copy of

Correct!

0x

characters indicating that a hex

Other Incorrect Match Options:

- characters indicating that an octal number follows them
- characters indicating that a binary number follows them
- deepcopy

Question 2

10 / 10 pts

Write a tiny program (mine was 12 lines before I added comments) which:

- Asks the user to enter a word
- Prints the number of unique letters in that word

Here are three separate executions of my program, showing my input and the program's output:

Enter a word : disambiguate  
disambiguate contains 8 unique letters

Enter a word : the  
the contains 3 unique letters

Enter a word : noon  
noon contains 0 unique letters
