You Answered

object_name.method_name()

function syntax form of dot not

Correct Answer

method syntax form of dot notation

Other Incorrect Match Options:

- function syntax form of dot notation
- a function that modifies the objects it receives as parameters, so that the caller sees those changes

Question 310 / 10 pts

Write a small program that:

- Asks the user to enter a sentence
- Outputs a message indicating whether the sentence is a pangram or not. A pangram is a sentence that uses every letter of the alphabet at least once, regardless of the case of the letters.

Enter a sentence for pangram-checking: Waltz, nymph, for quick jigs vex bud.
"Waltz, nymph, for quick jigs vex bud." is a pangram

Enter a sentence for pangram-checking: Python is an object-oriented programming (OOP) language.
"Python is an object-oriented programming (OOP) language." is NOT a pangram
